

## INTERVENTIONS IN DIFFICULT GROUP PROCESSES

### – workshop –

There are some psychodrama groups for children when we as leaders need our creativity to be able to maintain the group so children can develop in safe circumstances between the framework of psychodrama.

In our workshop we would like to demonstrate some of these difficult group processes, the obstructions of the leaders and some solutions to those.

We invite child's psychodramatists who have already experienced "blood sweating" psychodrama sessions, who know the feeling when the dramatist asks him/herself: is there any reason of what we are doing here?

We have worked together in *KacsARINGÓ ("Meandering") Tale Shop* since 2019.

We conduct 5-6 groups per school-year in the 2nd district of Budapest, Hungary.

We emphasize group-work and thinking together. We believe in the power of psychodrama, creativity and system approach. In our work we experienced, that beyond helping the clients, by cooperation we can help each other as well.
